Ashley Game Knife

ESEE Ashley Game Knife

Overall Length: 8.25"
Blade Length: 3.5"
Maximum Thickness: .156"
Steel: 1095 High Carbon, 55 - 57 Rc.
Weight: 5.1 Ounces (Knife Only)
Sheath: Leather Pouch
Finish: Black Oxide Stone Washed
Handle: Canvas Micarta (AGK Model)
Handle: Orange G10 (AGK-OR Model)
Made In The U.S.A.

Item #:
ESEE-AGK

Item #:
ESEE-AGK-OR

In 2018 ESEE Knives and professional hunter Ashley Emerson collaborated to design and create the Ashley Game Knife specifically for the hunting market. As a guide and hunter from Alaska to Africa, Ashley has had opportunities to deal with hundreds of deer, many more wild hogs, and other animals from squirrels to buffalo. As he has with guns, he's used many different knives and modified them to fit what works, and the AGK was born from his vast experience handling game in the field. The lengths of both the blade and the handle have been optimized for leverage for jobs like splitting a sternum. The handle incorporates a guard, a full tang, a proven grip shape, and a radiused lanyard hole large enough for a loop of 550 cord. The scales are Canvas Micarta, which is a solid handle material that doesn't slip when wet. Ashley has used a wide variety of scale materials, and he prefers Micarta for working knives, as the grip and feel is way more important when working game than the scales being impervious to sweat, blood, and other fluids. Like the stone-washed black-oxide blade, the scales develop a great "worn-in" look with use. The blade width allows for working inside the pelvic cavity of the average whitetail, and the subtle sweep of the blade places the point in line with the handle. This still allows an optimal drop point and an edge that is continually curved. With no sharpening notch at the choil, you won't have to worry about the knife catching on hides.

ESEE Gibson Axe

Overall Length: 10.5"
Head Width: 4.5"
Maximum Thickness: .25"
Steel: 1095 High Carbon, 55-57 Rc.
Weight: 20.5 Ounces
Finish: Stone Washed Black Oxide
Handle: Sculptured Micarta
Sheath: Leather
Made In The U.S.A.

Item #:
ESEE-GIBSON-AXE

The ESEE made in the U.S.A. Gibson Axe was designed by James Gibson as a small, compact axe that will easily fit in a backpack. Gibson's stated goal was a comfortable using tool that could do most camp chores, as well as being used as a carving axe. The Viking bearded head allows for close up work, and the finger grooves, textured scales and swell provide an excellent gripping surface when chopping. The 1095 high carbon steel frame is about as indestructible as you can get for an axe this size.

ESEE Pinch Pocket Survival Kit

Includes ESEE® Gibson Pinch® knife and sheath, RAT signal mirror, fishing kit, rescue whistle, button compass, Kevlar cord, sewing needle, fire starter kit and water collection bag.

Item #: **PINCH-KIT**

ESEE Expat Knives Darien Machete

ESEE Imlay

ESEE Imlay Rescue Knife

- Overall Length: 5.9"
- Blade Length: 2.25"
- Maximum Thickness: .156"
- Steel: 440C Stainless
- Weight: 3.1 Ounces
- Sheath: Molded Sheath
- Pommel Carabiner Hole
- O2 Wrench Slot
- Partially Serrated Blade
- Secondary Retention System
- Fully Ambidextrous Clip Plate and Retention System
- Made In The U.S.A.

The Imlay is designed for technical rescue, recreational rope work, water rescue and diving. It is made from 440C stainless steel, which allows the Imlay to resist rust and hold an edge longer than most competing brands. Includes sheath clip plate and secondary retention kit. Retention kit also available individually.

10% of gross sales for the Imlay Rescue knife go to support operational costs of RAT-SAR, a 501(c)3 non-profit, all volunteer search and rescue organization. Learn more by visiting their website: www.ratsar.org

Randall's Adventure Training®

P.O. Box 99
Gallant, AL 35972
Ph: (256) 613-3834

Email: info@randallsadventure.com Website: www.randallsadventure.com

HISTORY:

For the past 22 years, Randall's Adventure Training® has provided the necessary gear and training to survive some of the most remote locales on earth, whether it's interdicting drug traffickers in Colombia, building aid stations in Africa or simply surviving the local back-country. Having spent the past two decades training in the jungles of South America, as well as the back-country of North America, the company has grown into one of the most respected names in the survival training and knife manufacturing industries.

COURSES:

- Jungle Survival
- Wilderness Survival
- Land Navigation
 - Tracking
- Search & Rescue
- Technical Rescue
- Single Rope Technique
 - Canyoneering
 - Bushcraft

FACILITY:

Our "Farm" domestic training facility is located on 170 wooded acres and features an off-grid classroom, training tower and rifle/pistol range. The facility is privately owned and not open to the public. Our rope rescue courses utilize the farm and off-site locations featuring high-angle environments.

STANDARDS:

Integrity

We loathe dishonesty and choose to operate our business the way we'd like others to operate theirs: with honesty, transparency and integrity. You'll always know what to expect and what you're getting with Randall's Adventure & Training

Dedication

We teach to a standard without compromise. Randall's Adventure & Training is not a "rubber stamp" school, instead we focus our curriculum on quality, not quantity. To receive a certificate for a technical class, the student must demonstrate proficiency with the skill.

Passion

Our instructors have a true passion for their craft, instilled in them by years of "boots on the ground" experience and honing their skillsets in real world conditions. At Randall's Adventure & Training, continuing education is a way of life.

Mutual Respect

We welcome all students with a desire to learn. Any student willing to give us their best effort will always receive ours in return. We encourage our students to always seek out new training venues, instructors and experiences, and to always further their training education.

ESEE® KNIVES

Escuela de **S**upervivencia (school of survival) **E**scape and **E**vasion

ESEE Knives / Randall's Adventure & Training Explorers, Adventurers, Rescuers, Knife Guys

Beginning in 1997, Jeff Randall and Mike Perrin started down the path of reshaping the manner in which the survival and wilderness industry carried out business. Having become frustrated with the endless amount of exaggeration and hype often associated with "survival" gear and training, they launched Randall's Adventure & Training to bring realistic tools and knowledge to the consumer market.

Working under contract with the Peruvian Air Force's "Escuela De Supervivencia En La Selva" (School of Jungle Survival), also known by the acronym ESSEL, they introduced many clients to the art of jungle survival in the vast Peruvian Amazon jungle.

After a number of years operating in South America, they relocated their training stateside and launched a sister company to produce high quality field grade knives and gear. – ESEE Knives

From ESEE's beginnings on the floor of the Amazon jungle, they have searched out what works (and what doesn't) in the real world. Along the way, they have worked with some of the best wilderness experts, knife makers and manufactures in the industry. Jeff and Mike are also craftsmen, regularly producing "proof of concept" prototypes in their own shop before sending designs off to a manufacture for production.

ESEE knives are now carried by numerous adventurers, rescue technicians, hunters, woodsmen, law enforcement, military and special operations personnel worldwide. Today the ESEE brand is known and distributed worldwide. With the industry's leading warranty and made in the USA, ESEE has become the product that others are judged by.
